

Smoothwall Hybrid Filter

The safest, most secure hybrid filter in UK Education.
Combines the pioneering benefits of our on-premise Filter
with the flexibility of the cloud.

About Smoothwall Filter

Smoothwall Hybrid Filter has at its core all the pioneering benefits of our on-premise Filter with additional, important features. It provides the safest filtering possible whilst allowing students the richest, online learning experience - with no compromises on either side.

We call this balance SafeLearn and it's the highest standard of filtering in UK education.

Maximum
Safety

Rich Learning
Experience

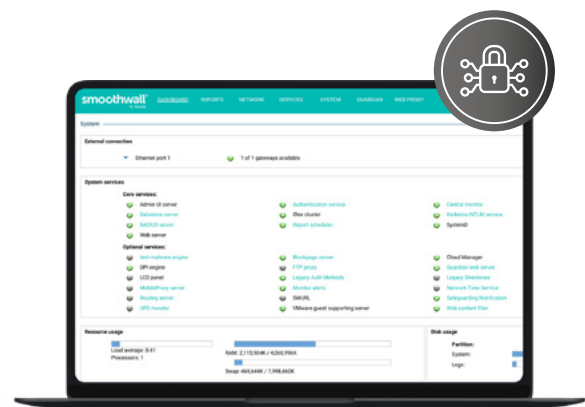

Trusted by 1 in 3 schools, Smoothwall Hybrid Filter is part of our Prevention & Enablement suite of solutions.

How it works

Smoothwall Hybrid Filter is unlike any other filter in education. It assesses the permissibility of a web page, not by referencing published blocklists, as with some Filters, but by evaluating its content, context and construction at the point of request.

This means harmful content is blocked the second it goes live. The hours, days, weeks and sometimes months required by other filters to recognise and block inappropriate content, time in which children are exposed to it, is a non issue with Smoothwall. Students are protected in real-time, all of the time. No matter the content, no matter when it went live.

Smoothwall Hybrid Filter also comes with deep granular controls enabling schools to determine who sees what, where and when enabling safe, age appropriate online experiences for every student in every education environment.

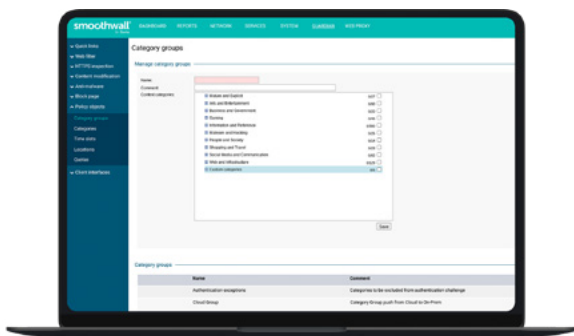

Smoothwall Hybrid Filter features & benefits

Highest possible safety:

- ✓ **Consistent safety levels on-premise and cloud**
Protects devices, (including iPads), whether on-premise or cloud, with 100% genuine real-time, content-aware filtering. Same location, same devices, same best-in-class filtering capability. No compromises.
- ✓ **Ensures all devices are cloud compatible**
Provides coverage for all devices, anywhere through a device agnostic on-premise appliance. Enables real-time, agile deployment of our cloud infrastructure from a single dashboard.
- ✓ **On- and off-network, filtering and reporting at all times**
Ensure your students are safe and on-track no matter what network they are connected to. Protects all devices, at all times including Windows, Chromebooks, MAC and iPads.
- ✓ **Least risk of data loss**
Stores data logs on-premise and in the cloud for added security and easy access in the event of a cloud hosting interruption. Minimises the risk of data loss.

*harnessing the power
of connection*

Resource efficiency:

- ✓ **Cost effective**
Benefit from full cloud without abandoning your existing on-premise environment.
- ✓ **Eliminate two filters**
No need for separate filters for on-premise and cloud. Streamline management with one best-in-class filter that seamlessly protects remote, on-premise and legacy devices from a single dashboard.
- ✓ **Time saving**
Save time by managing remote and on-premise devices centrally, ensuring seamless best-in-class filtering throughout.

Smoothwall Hybrid Filter's role in our Digital Safety and Wellbeing Framework

About our Framework

Our Digital Safety and Wellbeing Framework enables school leaders to explore our solutions as they apply to the three most common pillars found in health and safety planning:

1. Prevention
2. Early detection
3. Education.

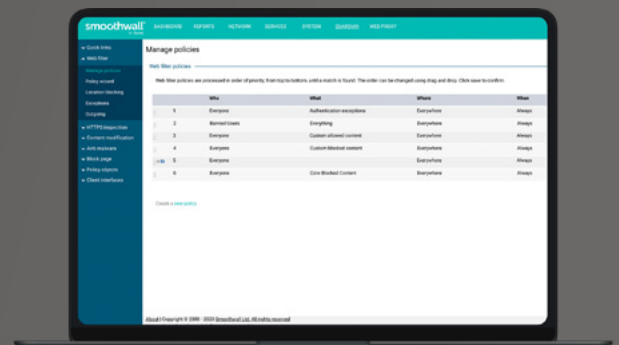

Schools can use this, supported by our Smoothwall team, to identify their priorities and plan the steps needed to achieve a more efficient and robust provision of care.

Our Framework is also a useful way for school leaders to keep abreast of the types of solutions available to them in the market. It also helps them better understand the role each of them plays and how they combine to build a digital wellbeing culture across the whole community

none of us is as powerful as all of us

The role of Smoothwall Hybrid Filter

Smoothwall Hybrid Filter sits in the Prevention & Enablement part of our Framework. It is the first line of defence in helping to prevent young minds from seeing inappropriate, harmful or dangerous online content. And to do so whilst enabling a full and rich learning experience with no absolutely no overblocking.
